# Kunal Raj

## Front End Engineer

I'm an adept Frontend Developer with expertise in HTML5, CSS3, and JavaScript, including React and Vue frameworks. My skills encompass responsive design, UI/UX principles, and optimizing web performance. I collaborate seamlessly with cross-functional teams to deliver high-quality web applications, consistently keeping up with industry standards and emerging technologies

## Experience (4 years Total)

 pickyourtrail

### Front End Engineer

October 2023 – Present

- Actively developed and maintained user-friendly web applications using React.js, TypeScript, and Next.js. Collaborated with the development team to implement responsive designs and optimize performance through server-side rendering and static site generation. Employed TypeScript for enhanced code quality and maintainability, ensuring a scalable front-end architecture.
- Revamped the entire product with better design and new features including advanced Filters, Cost tracking, Missed Savings; which not only saved the clients expense, also helped the product stand out in terms cost efficient travel.
- Optimized data fetching and state management in the application by leveraging React Query for efficient API calls and caching. Developed custom hooks to encapsulate complex business logic, improving reusability and maintainability across components. Implemented performance improvements by fine-tuning query and mutation logic, reducing unnecessary re-renders, and enhancing user experience with faster load times. These optimizations contributed to more scalable and responsive applications.
- Refactored legacy code to improve readability, maintainability, and performance. Conducted code reviews for junior developers, providing constructive feedback to ensure best practices, code quality, and consistent development standards across the team

## facilio

### Front End Engineer

May 2022 – September 2023

- Led the design, development, and maintenance of a critical feature, resulting in improved user engagement and retention. Ensured the feature aligned with project objectives and client requirements.

## Skills

Javascript
HTML
CSS
Python
C/C++
C#
Unity

## Frameworks

React
NextJS
Nuxt
Vue
Unity (Game Engine)

## Libraries

Redux
Jotai
VueEx
RadixUI
ElementUI

## Tools

Git/GitHub
Hubspot
Ghost CMS
Google Analytics
Figma
Supabase

- Extensive experience in developing dynamic and interactive web applications using React.js. Created custom components and efficiently integrated them into the product, resulting in enhanced user experiences.

- Actively participated in bug identification, troubleshooting, and resolution for various features within Vue.js applications. Collaborated with the development team to resolve issues promptly and maintain application stability.

- Proficient in developing websites and blogs using Ghost CMS, a headless content management system. Created custom themes and templates to provide clients with unique and user-friendly web experiences.

- Collaborated closely with design and marketing teams to translate design concepts into fully functional HubSpot modules. This collaborative approach ensured alignment with client branding and marketing goals.

## FLATRADE

### Front End Engineer – Intern
October 2020 — October 2021

- Designed and developed responsive web pages and landing pages using React.js.
- Collaborated closely with UI/UX designers to bring their designs to life with pixel-perfect accuracy.
- Ensured seamless navigation and user interactions within web pages.
- Worked closely with team members to meet project deadlines and deliver high-quality web assets.
